

# Dehumidifiers

**Hilton  
STUDIO**

## Book Room Dehumidifiers

Protect your Books of Remembrance and book cabinets from costly damp and condensation damage.

Moisture migrates around a room collecting as condensation on cold surfaces such as windows and glass cabinets. This can cause mould formation on book cabinets and enclosed books, permanently damaging your expensive investments.

We can supply dehumidifiers to collect excess moisture in the air, a particular problem in book rooms containing floral tributes.

The unit also uses a filter system to remove dust particles from the air.

Please enquire for further information.

Our full range of leaflets are available to download online.

## Technical Details

Complies with EMC/RFI directive EN60555 (BS800)

Min Operating Temperature: 3°C  
Max Operating Temperature: 35°C  
Fuse Rating: 5A  
Power consumption: 0.46kW  
Noise: 48db  
Weight: 14kg

Indoor Use Only

Dimensions:  
H:60cm x W:41cm x D:25cm

## Features

25L Max Extraction Rate  
SMART Control™  
Auto, Continuous & Economy Modes  
Boost Control  
Fan Only/Air Cleaning Mode  
Audible Unit Full Alarm  
Intelligent Defrost System  
Fan Speed Controls  
Permanent Drainage Facility [Optional Extra]
