

## Timber Flat Bed Handling

Please take note of the following care guidelines, as incorrect handling may result in damage to your product.

Please **Do Not** handle the flat bed by the posts. Any undue movement will cause misalignment of the centrepiece which is made specifically to fit each individual product. They are encased in the product and any damage would result in the flat bed having to be stripped down for repair.

When placing the centrepiece on the posts it will rest in position, do not place any pressure on to the centrepiece to avoid damage to the posts or centrepiece. Your centrepiece has been checked to ensure it fits correctly before leaving the studio.

Your Flat Bed Display has undergone quality control checks before leaving the studio to ensure your utmost satisfaction with the product.

We welcome your comments / reviews on our Facebook or Twitter pages. If you require anymore help or advice please call (01543) 372 326
