

Floris Plaque Scheme

Hilton
STUDIO

Floris Memorial Plaques

Floris Wall Plaques provide a tangible and fitting memorial for a loved one. Manufactured from one of the new generation of solid surfacing materials, with the appearance of stone, the plaques are extremely durable and therefore equally suitable for internal and external locations.

Configuration

The configuration of each scheme can be designed to meet the specific requirements of each site but in order to keep costs to a minimum the preferred layout is in columns, each 10 plaques high.

Fixing Method & Security

The plaques, surrounded by a contrasting dark grey border, are mounted in the specified groups onto polyester powder coated folded steel back plates. The back panels are securely fastened to the wall or other surface, and are designed to allow for the speedy removal and replacement of plaques as required. Unlike schemes using bronze or similar metals, the materials used in the manufacture of Floris plaques have no inherent scrap value, and consequently the risk of theft is much reduced.

Installation

Initial installation may be carried out by your own staff, or if preferred we can arrange to undertake this work, subject to a separate quotation.

Plaques

Individual plaque size is 300mm X 119mm, accommodating a name line of up to 24 characters, plus 4 further lines, each of 32 characters maximum. In addition to this, each plaque can be embellished by the clients choice of one of the elements, shown here on the left.

Choice of engraved designs

A miniature vase suitable for a single stem flower

An oval ceramic insert with either a hand painted motif or photo
